Slimline

These Turret lampholders are made of all polycarbonate construction providing “*great impact strength*” with “*quick snap in*” feature for easy assembly. A “*solid key*” eliminates rotation with “*ONE*” mounting hole size for all models. These are available in both in lose piece or on end plates with cans. The enclosure cans are available in a baked “*white powder coated metal*” or “*plastic*” and “*deep or shallow*” getting the look you want from your product. See web site [www.etlin.com](http://www.etlin.com)
